Forecast for Sunday 15 Nov 2020

Weather: Rather cloudy with frequent showers that merge to longer periods of rain at times, mainly through the late afternoon and early evening. Risk of hail and thunderstorms, particularly during the afternoon and across western peaks. Turning drier with more broken cloud cover during the mid to late evening for a time.

Chance of cloud free mountain/hill tops above 600m: Generally 40% becoming 20% during the late afternoon and early evening with bases broken to overcast from 500-700m, then improving 80% for a time late evening.

Visibility: Good lowering to a handful of kilometres in rain and showers, and less in hill fog.

Forecast for Monday 16 Nov 2020

Weather: Cloudy with frequent showers at first, but turning largely dry and increasingly bright towards mid-morning. Cloud gradually thickening and lowering from the west from early afternoon, heralding the area of rain that pushes across the area during the late afternoon and early evening. Rain turning heavy at times, particularly in western areas of the Park where hill fog becomes extensive.

Maximum wind: Westerly mean 30-35 mph at first with gusts 50 mph across most exposed ridges and summits, before gradually easing from late morning.

Chance of cloud free mountain/hill tops above 600m: 30% at dawn, increasing 80% from mid-morning, becoming by evening nil in west and 20% in east, as bases become extensive to broken from 450-600m

Visibility: Good or very good, sporadically lowering to a handful of kilometres in early showers, then more generally in later rain.

Temperature: **Valleys:** Plus 3 Celsius rising to 12 Celsius during the afternoon
At 600m: Plus 4-5 Celsius rising 7-8 Celsius
Freezing level: Above summits
